

## 25 Back Then

Lauren Christy

So long war  
Rock 'n' roll has not been heard before  
In their long black cars  
Technicolor movies for the stars  
I wish I'd learned to dance the way my parents dance  
It seems I always try to lead the man  
'Cause I can  
I wish that I was 25 back then  
London's high  
Marianne is faithful to the sky  
And a brand new beat  
Floating from a room across the street  
It wasn't only Armstrong up there on the moon  
It seemed everybody's head was in the sky  
Sometimes I  
I wish that I was 25 back then  
What I need is Jean Picard  
To teach my how to fly  
Get to meet whatever's up there  
Watching from the sky  
Bring back a new cigarette  
That doesn't make you die  
Don't want a super highway  
Just want a super high  
Sometime I  
I wish that I was 25 back then  
And the world moves on
