

The Devil Grins

Lay Down Rotten

Drowning - swallow the sun
In this solitude of this cold embrace
Laughter wakes me - makes my skin crawl
Endless, worthless - fear takes over
The shades are down - stuck here again
Silence won't last - panic and sorrow
The high is gone-i am alone

The devil grins-my demons salute mm
Hall to addiction-i hear them whisper

Bury the treasures - bury them deep
Of what once was - that will never be
Scar the face - rip off the spit
Dim the lights - for my time has come
I fail again

The devil grins-my demons salute him
Hall to addiction-i hear them whisper

More is enough - forever this night
Damn the dream a my flag is black

Inhale - the fire of temptation

Silence screams within my despair
Yet there is no answer
Waiting for the dawn

Exhale - the wisdom of distinction

Gone with the first rays of light
Gone with the first rays of light

The devil grins-my demons salute him
Hall to addiction - i hear them whisper
The devil grins-and i smile back
Hall to addiction-hall to isolation
