Take me home

Just do it right

Make it perfect and real

Because it's everything

No everything was never the deal

So grab your things and stumble into the night

So we can shut the door

Oh, shut the door on terrible times

Yeah, do it right

And head again into space

So you can carry on

And carry on, and fall all over the place

This is the trick, forget a terrible year

That we can break the laws

Until it gets weird

And this is what you waited for

But under lights, we're all unsure

So tell me

What would make you feel better?

As night has such a local ring

And love and rock are pick-up things

And you know it

Yeah, you know it

Yeah, you know

Take

Forget your past

This is your last chance now

And we can break the rules

Like nothing will last

You might forget

Forget the sound of a voice

Still you should not forget

Yeah, don't forget

The things that we laughed about

And after rolling on the floor

And thankfully, a few make sure that you get home

And you stay home

And you better

'Cause you're afraid of what you need

Yeah, you're afraid of what you need

If you weren't, yeah you weren't  
Then I don't know what we'd talk about

Yeah no one ever knows what you're talking about  
So i guess you're already there  
No one opens up when you scream and shout  
But it's time to make a couple things clear

If you're afraid of what you need  
If you're afraid of what you need  
Look around you, you're surrounded  
It won't get any better

Until the night
