

# I Can Change

LCD Soundsystem

Tell me a line  
Make it easy for me  
Open your arms  
Dance with me until I feel alright

It's good in the dark  
Good in the dark  
But into the lover's light  
Here comes another fight

So ring the alarm, ring the alarm  
Bar me and hold me and cling to my arm  
Here it comes, here it comes

And what you're asking me now  
Disastrous now  
Hoping and hoping, and hoping  
The feeling goes away

Never change, never change  
Never change, never change  
Never change, never change  
Never change, this is why I fell in love, oh

Never change, never change  
Never change, never change  
Never change, never change  
Never change, that's just too up there in love with

Oh, this is the time  
The very best time  
So give me a line and take me home  
Take me over

But dashing the hopes  
Dashing the hopes  
And smashing the pride  
The morning's got you on the ropes, oh

And love is a murderer  
Love is a murderer  
But if she calls you tonight  
Everything is alright, yeah, we know

And love is a curse  
Shout in a hearse  
Love is an open book  
To a verse of your bad poetry  
And this is coming from me

But I can change, I can change  
I can change, I can change  
I can change, I can change  
I can change if it helps you fall in love, in love

I can change, I can change  
I can change, I can change

I can change, I can change  
I can change if it helps you fall in love, in love

Turn on the light  
Make it easy for me  
Fill the divide  
Fumble in the kitchen 'til it's right  
What an awful sight

But there's love in your eyes  
Love in your eyes, love in your eyes  
But maybe that's just your lover finds  
All night

(4x)  
And I can change, I can change  
I can change, I can change  
I can change, I can change  
I can change if it helps you fall in love, in love
