

4 months and 8 days  
Been waiting here  
Transporter broken  
Horizon's clear

(DAY ONE)  
No vegetation  
Blips on my screen  
Whatever was here  
Has been disappeared

Now here's alright (2x)

(DAY TWO)  
Wait tower  
Radar's going off  
I see a small creature  
Who can barely walk

My data says "large"  
But what I see is small  
Text reads "Big Danger"  
But this just looks tired

Now here's alright (2x)

(DAY THREE)  
Come in tower  
All our data's wrong  
Research inconsistent  
We misread it all

There was no monster  
And what's left is near dead  
Control killed a phantom  
From inside their heads

Nowhere's alright (4x)
