

We Could Be in Love

Lea Salonga

Be still, my heart
Lately its mind is on its own
It would go far and wide
Just to be near you

Even the stars
Shine of it bright I've noticed
When you're close to me

Still it remains a mystery

Anyone who's seen us
Knows what's going on between us
It doesn't take a genius
To read between the lines
And it's not just wishful thinking
Or only me who's dreaming
I know what these are symptoms of
We could be in love

I ask myself why
I sleep like a baby through the night
Maybe it helps to know
You'll be there tomorrow

Don't open my eyes
I wake from the spell I'm under
Makes me wonder how

Tell me how I could live without you now

And what about the laughter
The happy ever after
Like voices of sweet angels
Calling out our names
And it's not just wishful thinking
Or only me who's dreaming
I know what these are symptoms of
We could be in love

All my life I have dreamed of this
But I could not see your face

Don't ask why two such distant stars
Can fall right into place

Oh, it doesn't take a genius
To know what these are symptoms of
We could be...
We could be...
We could be in love
We could be in love
