

# We Could Be in Love

Lea Salonga

Be still, my heart  
Lately its mind is on its own  
It would go far and wide  
Just to be near you

Even the stars  
Shine of it bright I've noticed  
When you're close to me

Still it remains a mystery

Anyone who's seen us  
Knows what's going on between us  
It doesn't take a genius  
To read between the lines  
And it's not just wishful thinking  
Or only me who's dreaming  
I know what these are symptoms of  
We could be in love

I ask myself why  
I sleep like a baby through the night  
Maybe it helps to know  
You'll be there tomorrow

Don't open my eyes  
I wake from the spell I'm under  
Makes me wonder how

Tell me how I could live without you now

And what about the laughter  
The happy ever after  
Like voices of sweet angels  
Calling out our names  
And it's not just wishful thinking  
Or only me who's dreaming  
I know what these are symptoms of  
We could be in love

All my life I have dreamed of this  
But I could not see your face

Don't ask why two such distant stars  
Can fall right into place

Oh, it doesn't take a genius  
To know what these are symptoms of  
We could be...  
We could be...  
We could be in love  
We could be in love
