

# Should Have Known

Lee Aaron

I should have known it  
When I first saw you at school  
I was chasin' you around  
And you were playin' me for the fool

Friends would laugh at me  
I didn't really know why  
But when I know the reason  
You can take your turn ta cry

I should have known it  
At the party Saturday  
You were makin' eyes at me  
An' it was time for me to play

I played my guitar  
'Til my fingers ached inside  
Then I saw you kissin' her  
You looked at me an' waved goodbye

(I should have known)  
That you would run away  
(I should have known)  
That ya had no plans to stay  
(I should have known)  
That night you waved goodbye  
(I should have known)  
When ya tell me all those lies

I should have known it  
When I watched you walk away  
That one-time lover  
He'd be back my way some day

I'm hot to trot  
I'm makin' time with every guy  
But it's just one night for them  
An' then I aw tell them goodbye

(I should have known)  
That you would run away  
(I should have known)  
That ya had no plans to stay  
(I should have known)  
That night you waved goodbye  
(I should have known)  
When ya tell me all those lies

(I should have known)  
That you would run away  
(I should have known)  
Ya had no plans to stay  
(I should have known)  
That night you waved goodbye  
(I should have known)  
When ya tell me all those lies

(I should have known)  
That you would run away  
(I should have known)  
That ya had no plans ta stay.  
(I should have known)  
That night you waved goodbye  
(I should have known)  
When ya tell me all those lies
