

# Long Night

Lee Kernaghan

There's a strong wind blowing off the mountain  
It's not a welcome sight  
From a cigarette swag on a two dog night  
Im so tired of this droving  
The dirt, the durt and heat  
I'm weary to my bones but I can't sleep

It's a long night staring at the fire light  
It's a long night missin' you  
It's a long night and the wind begins to bite  
It's a lonely night missing you

Andy drives a road train, He's been away a while  
But to make ends meet, he's gotta make a mile  
By morning if he drives all night, he just might make it home  
He calls Mary on his satellite telephone  
And he says

It's a long night staring at the dash board light  
It's a long night missin' you  
It's a long night and the wind begins to bite  
It's a lonely night missing you

Maggie's beau shoots roos for a living while she waits at home  
And there's a Quantas piliot flying out to Rome  
Nurses are doing nightshift while a copper walks the beat  
And I'm still crowding the fire trying to make some heat

It's a long night staring at the fire light  
It's a long night missin' you  
It's a long night and the wind begins to bite  
It's a lonely night missing you
