

# The Outback Club

Lee Kernaghan

Works a 12 hour day from sun up til sun down  
He's doing what he can to make the wheels go round  
In a shed down the track he knows how to bend his back  
He's the soul of the earth he's got a heart of gold

He's a member of the out back club  
He don't back down and he dont give up  
He's living in the land he loves  
Born and raised he's a member of the outback club

She rides the boundry fences with the blokes  
She's a match for any man alive when she works the mob  
Before the job is done theres another just begun  
A kinda woman any man'd be proud of

She's a member of the out back club  
She don't back down and she dont give up  
She's living in the land she loves  
Born and raised she's a member of the outback club

Ho!

Works the field maybe just to bringing out the crop  
There out there working their fingers to the bone  
Might be jerking the stock or maybe working the mob  
They got one thing in common, the country heart and soul

Their members of the out back club  
They don't back down and they dont give up  
Their all living in the land they love  
Born and raised their members of the outback club

We're all members of the out back club  
We don't back down and we dont give up  
We're all living in the land we love  
Born and raised we're all members of the outback club  
We're all members of the out back club  
We don't back down and we dont give up  
We're all living in the land we love  
Born and raised we're all members of the outback club  
Yeah we're born and raised we're all members of the outback club
