

# What I Don't Know

Lee Rocker

I love girls in pictures, I love em in song  
I've known me a few, before she came along  
This one tested my metal, yeah she grounded down good  
Turns out what I don't know about women fills a mighty  
big book

She came without warning, she knocked down the screen  
Said what I'm gonna show you, somethin you never seen  
Well what was I thinkin, when I gave her a key  
What I don't know about women, might be the end of me

What I don't know about women,  
I guess I don't know too much  
Some roses at the beginning,  
well it use to be enough

What I don't know about women, fills a might big book  
The darkest cloud ever, was over my house  
And it felt like forever, soon love had run out  
She left like she came in, so I took one last look  
Turns out what I don't know about women  
What I don't know about women  
What I don't know about women  
Fills a mighty big book
