

Repossessed

Legion of the Damned

Reciting from the book of the dead
The ancient passages are read
The release of evil entities
After dusk
Unspeakable evil in the woods
From the time before time
They will try
To possess them all

The first soul to be swallowed
She starts speaking in tongues
Forced to have her
Decapitated
Enter the wooden house again
Buried the guts of your dead friend
There's no way out
Of this cursed place

Possessed again
In this night of dread
Possessed again
At dawn they are dead

Awakened by the morning light
Night of possession he survived
As his demon eyes disappear
Soon possession reoccurs
As the darkness sets in
The corpse rises
From it's grave

Lifeless objects fill the room
With hysterical laughter
As the doors to madness
Are open wide
Four more visitors arrive
And one by one they fall
Damned forever
To burn in hell

Possessed again
In this night of dread
Possessed again
At dawn they are dead

Possession
Necronomicon's dread
Possession
Black book of the dead
Possession
Hear the tortured cries
Possession
Join us or die

Possession
Necronomicon's dread
Possession

Black book of the dead
Possession
Hear the tortured cries
Possession
Join us or die

Fiendish corpses slain
Chainsaw dismemberment
Limb by limb
They are torn apart
Hacking up the second
Split open his skull
Blood and guts
Drip from the walls

Severing the dead flesh
Chainsaw lust in his eyes
Merciless butchery
Another one dies
Ripping the possessed to shreds
Severed body parts
Of doomed souls
Dead yet alive

Possessed again
In this night of dread
Possessed again
At dawn they are dead

The curse of the Necronomicon
Opening pathways to the beyond
The gate to darkness
Must be closed
Wading through the guts of the dead
Banishment needs to be read
To avert
The forbidden evil

Dreaded passages inked in blood
Hold the keys to close the gate
The void transcending
Space and time
Supernatural horror
Sucked into damnation
The Necronomicon
Has sealed your fate

Possessed again
In this night of dread
Possessed again
At dawn they are dead
