

There's A Robot In My Head

Lemon Demon

There's a robot in my head
There's a robot in my head

It is screwing everything up
I can't sit still, still
I hear the servos whirring
All night long, all night long
If you were to open up my skull
You would see it there
Perched atop my brain
Moving, stitching, slaving, smiling, waving

I think he's kinda cute
Little metal brain parasite
I love you

There's a robot in my head

Hello?
I am the robot.
Hello?
I am the robot.
Hello?
I am the robot.
Goodbye.
