

All Around The World

Lena Katina

Like your heart is lost
And it can't find its way home
Does it feel like your shine is gone
And you can't go on anymore

Just go... oh oh oh oh

All around the world
All around the world
All around the world
It's all connected

All around the world
All around the world
All around the world
We're all connected

Does it feel like a million years
Waiting for your time to come
Don't you know that you've come this far
But there's so much road left to run

Just go... oh oh oh oh

All around the world
All around the world
All around the world
It's all connected

All around the world
All around the world
All around the world
We're all connected

Take a breath
And let it out
Cause everything has led to now

So go... oh oh oh oh
Just go... oh oh oh oh

All around the world
All around the world
All around the world
It's all connected

All around the world
All around the world
All around the world
We're all connected
