

Caterpillar in the Rain

Lena

Since the day we met
Far away from now
Still just what I get
I feel like in a bow

I went all the way
Facing to the world
Waiting for the day
For me just to unfurl

I'm still nibbling on the leaf...

Won't you take me down
To the spot where you'll be always around
Don't you leave me
Standing here in vain
Like a little caterpillar in the rain

I filled my diary
With countless little words
It's still my fantasy
Even if it hurts

It seems just like a dream
To be with you right now
I just want to see
The love I haven't found

I'm still nibbling on the leaf...

Won't you take me down
To the spot where you'll be always around
Don't you leave me
Standing here in vain
Like a little caterpillar in the rain

Won't you take me down
To the spot where you'll be always around
Don't you leave me
Standing here in vain
Like a little caterpillar in the rain

Like a caterpillar
