

You Could Have

Lene Marlin

What if she twisted the truth to fit in
Hide all her scars where to begin there are so many
The tales of her life some are too deep cut with a knife
Some of them will never, never disappear just like the screams
and the crying she'll hear

You could come to get her you could have
You could come to protect her you should have
Somehow she managed she's still around

Every night she closes her eyes talks to the angels then cries
But no one came to take her away
Just the way it is, nothing will change always like this
Then she just gave up gave up trying, a part of her still she w
as hoping

You could come to get her you could have
You could come to protect her you should have
Somehow she managed she's still around

You could come to guard her you could have
You could come to save her you should have
Somehow she managed she's still around

Let's make it easy
Let's twist the truth
Sometimes it hurts too bad
For you to know

You could come to get her you could have
You could come to protect her you should have
Somehow she managed she's still around

You could come to guard her you could have
You could come to save her you should have
Somehow she managed she's still around
