

Everyone

Leo Sayer

Unless you've been asleep or dead
Lying safely in your bed
You can't have missed
The global sense of fear

We have the right to disagree
Still we abuse this liberty
We gamble 'til the end is getting near
Well me I wanna dissapear 'cos

I love everyone - I love you all
I just wish that there was peace on earth
One God to save us all

We harvest every inch of space
Accelerate the human race
Create so much
And yet we say we're bored

We beg and steal, re-populate
With urban dreams that nurture hate
And celebrate each juicy little war
If more is less - then less if less is more

I love everyone - I love you all
I just wish that there was peace on earth
One God to serve us all

A heart will simply break
When it has to steal
When it has to beg
For every single meal

And now I stand and view my life
I've done some things, that were not right
I've caused more hurt, than I can ever heal
For me it's simple, here's the deal...

I love everyone - I love you all
I just wish that there was peace on earth
One God to save us all

We'll never have to fall
Never have to fall
One God to save us all....
