

# Collide

Leona Lewis

I'll pick you up when you're down  
Be there when no one's around  
When you're in unfamiliar places  
Count on me through life's changes

I'm in tune with how you feel  
Everything bout this is real  
When you're in unfamiliar places  
Count on me through life's changes

You're all I want, yeah yeah  
I know you're the one, yeah  
You're all I want, yeah  
I know you're the one, yeah

Crash into me  
At full speed  
Crash into me  
We can collide, we can collide

Crash into me  
At full speed  
We can collide, we can collide  
We can collide, we can collide

Crash into me

We can collide, we can collide  
We can collide, we can collide

When you're in unfamiliar places  
Count on me through life's changes

Know that you're never alone  
In me you can find a home  
When you're in unfamiliar places  
Count on me through life's changes

You're all I want, yeah (yeah)  
You're all I want (oh), yeah (yeah yeah)  
You're all I want, yeah (you are the one)  
I know you're the one, yeah (you are)

Crash into me  
At full speed  
We can collide, we can collide  
We can collide, we can collide

Crash into me  
We can collide, we can collide  
We can collide, we can collide

We can collide, we can collide  
We can collide, we can collide
