

# Boys Like You

Leona Naess

Blue light flashing in my heart tonight  
Telling me that I'm alright and will be for some time  
Leave me now, playing on a radio  
Leave me for the friends you know I'll only break your heart  
Sundays, I remember you  
With your sleepy eyes shading pale blue

My baby's gone and everybody knows  
The fever hit me in my fingers and through my toes  
This baby's gone, yeah boy you know it shows  
This baby's gone

Will I see you again another time, time, when?  
When I knew you my heart was in bends  
And I know I never said "Goodbye"  
But boys like you don't ever cry

Don't speak the smile is sliding down my cheek  
I only came here to get what I need  
White light blinding my way tonight  
Will you remember me like I was?

'Cause my baby's gone and everybody knows  
The fever hit me in my fingers and through my toes  
This baby's gone, yeah boy you know it shows  
This baby's gone

Will I see you again another time, time, when?  
When I knew you my heart was in bends  
And I know I never said "Goodbye"  
But boys like you don't ever cry

My baby's gone, yeah boy you know it shows  
This baby's gone

Will I see you again another time, time when?  
When I knew you my heart was in bends  
And I know I never said "Goodbye"  
But boys like you don't ever cry, don't ever cry  
Don't ever cry , don't ever cry , don't ever cry
