

Foreign Cab Rides

letlive.

Now that I am dead I hope that ascend to you
"To who?" Always to you. I'm on my way back down
I'll just live it up then shake it off so I never gotta think a
bout it

I'm like night and day
I never want to stay. Do you? You do? Me too
I'm on my way back down
She said "Turn me on then get me off so we never gotta think ab
out it."

Stay with me and share my disease
Gotta find a way back home on the way...

Now that I am dead I finally get to rest with you until you're
through and send me on my way back home
Because you've given up, taken off, so you never have to worry
about it

Be careful what you say, you might have hell to pay
"I do." You do? Me too
That's why I am all alone
Because I'm right above 'don't give a fuck' and just below 'I c
annot live without it'

Stay with me and share my disease
Gotta find a way back home
So please stay with me and die faithfully
Because there's no one left to save your soul on the way down

And if you're my better half you won't know a thing about love
either
I know that I'm pathetic
I knew before you said it

Stay with me and share my disease
Gotta find a way back home
I want to find a way back home
