Don't Make Me Wait

Baby some things never need to be said If you're a man tell me what we're doing next I can't stay here forever Don't expect me to take the first step You shouldn't have to read my mind See my body's telling the story? And it's saying you can be the star tonight So you better come and get me Don't make me wait Baby I don't wanna wait You better come and get me Don't make me wait

Don't turn me into a regret You're in my head, what's some words you never said? It's that close that we get You know I could tell, you're a bully in the bed Boy I don't have to read your mind See your body is telling the story And it's saying I should be all yours tonight Bet you try to come and get me Don't make me wait Baby I don't wanna wait You better come and get me Don't make me wait Baby I don't wanna wait You better come and get me Don't make me wait
