## **Run Down**

The wind's blowing ashes The sky's filled with dust Too scared to run But God knows we must Missed our last ride to a safe haven Caught in a landslide Of molten crust Preachers of wisdom Victims of trust Some are cryin', some are praying R: Run down the hill Like never before Mind your footsteps Fly, don't fall The ground is shaking The earth is breathing fire Oh Holy Maria What have we done Leaning the wrong way The hill's going down Trading places, Hell and Heaven R: R2: Run down the hill Stumble, be gone The devil's laughing above us all Twisting, breaking The earth is breathing fire R: R2: Run down the hill (3x) Just run it down Run it down Just run it down Run down the hill
