Lewis Watson

Grab your coat and don't forget my guitar
Just as soon as I find the keys to my car
We can drive until the sun becomes stars
Just, you and I into the dark

It's not like we have to see the whole world
Just as soon as no-one knows who we are
We can stop or we can make a new start

And you need to know that whatever brings you down
It's not worth your time
Ohh, forget it all
And just forget it all

And I don't care where we go
Just keep me close
There ain't nothing to hold me from you
Just keep me close
Oh, won't you keep me close?

In the morning we can open our eyes
And just lie there 'till we're used to the light
Spend a day without a single "goodbye"

And you need to know that whatever brings you down
It's not worth your time
Ohh, forget it all
And just forget it all

And I don't care where we go
Just keep me close
There ain't nothing to hold me from you
Just keep me close

And I don't care what comes next
Or what life throws
Just put your hand in my hand
And never let it go
Darling won't you keep me close

Just forget it all
Ohh, forget it all
Just forget it all

And I don't care where we go
Just keep me close
Where there ain't nothing to hold me from you
Just keep me close

I don't care what comes next
Or what life throws
Just put your hand in my hand
And never let it go
Darling won't you keep me close
