

What About Today?

Lewis Watson

Call me up
'Cause you know that I'll be there
Hell, this is so messed up
But that doesn't mean I don't care

"Stay the night", you whisper to me,
Well you know that I can't
But you'll just cry if I were to disagree

Take this away, take this away
You loved me last night but what about today?

You keep saying we were meant to be,
Well it must be the alcohol
But it feels great when you're hugging me
Into my body you fold

Well, your tongue tastes of nicotine
But you're saying that you just had one
Wait, why are you kissing me?
I thought you needed some time alone

Take this away, take this away
Oh, you loved me last night but what about today?
Take this away, take this away
Well you loved me last night but what about today?
