

Never Give Up

Liberty X

We were looking round
Waiting for the right time
Everybody saying careful what you do
You've got everything to prove, they were saying
You gotta do it now cos if you don't you know you're gonna fade
away
You gotta listen to what we say
Gotta realise you don't know the same like I do

We drew the line
Used our own minds
Chose not to take their advice
We didn't know,
Which way to go
So we just followed the signs

Never let them get you down
You've got to turn around and
Find your own way to it
You know its up to you
To pull yourself through
All the troubles it's a struggle
But be strong and you'll do it
