Never Give Up

We were looking round Waiting for the right time Everybody saying careful what you do You've got everything to prove, they were saying You gotta do it now cos if you don't you know you're gonna fade away You gotta listen to what we say Gotta realise you don't know the same like I do

We drew the line Used our own minds Chose not to take their advice We didn't know, Which way to go So we just followed the signs

Never let them get you down You've got to turn around and Find your own way to it You know its up to you To pull yourself through All the troubles it's a struggle But be strong and you'll do it Liberty X
