

## Where Do We Go From Here

Liberty X

Some people go through life searching for someone  
I thought I had mine and you thought you'd found yours  
But when I close my eyes to sleep at night  
It should be her on my mind  
But it's you I tend to find, tell me.

Should we run  
Should we hide from all the feelings inside  
Let's not waste no time  
Where do we go from here  
Do we act on emotions that we cannot deny  
Let's not waste no time  
Where do we go from here (where do we go from here)  
It's not as easy as a yes or no  
Wherever we turn  
There is nowhere we can hide (there is nowhere we can hide)  
Wish I could just be strong and walk away  
There's no peace of mind, I need to know  
Do we simply cross the line, tell me.

I'm finding it hard to stay on this narrow road  
It would be easy to stray if he did me wrong  
They say that true love comes once in a lifetime  
But this fire inside us keeps us questioning all that we once believed.
