

Heroin Dreams

Life of Agony

And it was never enough
And it was never enough now
That heroin stuff
Traveling through Daddy's arm now

Cuffed in that junk who knows if I would survive
Once you start shooting, forget living life
Lost in your shadows, no soul, no backbone
Sucked in, locked down, spinning breakdown, heroin whores

Everybody's talking about heroin dreams...
What the fuck you gonna do with the rest of your life?

Scream at me, back slap me, chew off my ears
And I can't stop this sickness, I've been trying for years
Deeper and deeper lies, sensational fears
They're here just to guide you as we age through the years

Everybody's talking about heroin dreams...
What the fuck you gonna do with the rest of your life?
What the fuck you ganne do with the rest of your time?

I'm lost in your shadows...
