

Where I Come From

Lifehouse

The stars light the road
That's bringing me back home
With beat-up dreams
Open eyes and broken wings

No matter how far
You're always on my mind
I don't know where you are
But somehow you always find me

So why am I feeling so alone
Looking back
You were the only one
And I feel so far from home
Wherever you are is where I come from

Have I lost control?
Was it ever mine?
I'm trying so hard to hold
On to my peace of mind

Through all of these years
At times you felt like a ghost
But you were here
When I needed you the most

So why am I feeling so alone
Looking back
You were the only one
And I feel so far from home
Wherever you are is where I come from
Wherever you are is where I come from

So why am I feeling so alone
Looking back
You were the only one
And I feel so far from home
Wherever you are is where I come from
Wherever you are is where I come from
Wherever you are is where I come from
