

From All Sides

Lights

Here in the open
Cool as a hand in the dark
Near as the voices that hang in the air
They're coming through
Caught in the moment
Sweetness and weakness are high
Gone like the shadows that follow me there
They're coming through you

Constantly killing me
With your invade in my mind
You got it covered I can't get a thought in edgewise
Oh with your fast lips, and not a catalyst
Seems like the memories are coming at me from all sides
You're all I see, surrounding me
From all I sides, you're all I see, surrounding me

Booms like a system
Swallows the sense of me whole
Love is the weapon that chases me there
Rushing to you
I'm the island, you're the ocean that's

Constantly killing me
With your invade in my mind
You got it covered I can't get a thought in edgewise
Oh with your fast lips, and not a catalyst
Seems like the memories are coming at me from all sides
You're all I see, surrounding me
From all I sides, you're all I see, surrounding me

I'm Tyche orbits
Where you have me
Barely noticed, falling madly
From all sides

Constantly killing me
With your invade in my mind
You got it covered I can't get a thought in edgewise
Oh with your fast lips, and not a catalyst
Seems like the memories are coming at me from all sides
You're all I see, surrounding me
From all I sides, you're all I see, surrounding me

Constantly killing me
When you're invading my mind
You got it covered I can't get a thought in edgewise
Oh with your fast lips, and not a catalyst
Seems like the memories are coming at me from all sides
Coming at me from all sides
