

## In The Dark I See

### Lights

Here in the stillness, the quiet place  
Where I'm lying with a down turned face  
You come and distract me  
From what's coming at me  
Give me something to look forward to  
Truth be told, sometimes it's only you  
Nothing is at stake here  
When we are awake here

It's you who brings the morning  
And you who takes the sun when I sleep  
You're the only who stuck around  
For me when I was losing  
Faith in what I thought I would be  
You're the only one in the dark I see  
The dark I see  
The dark I see

I know I lose my heart so easily  
Trying to only show the best of me  
And I go into hiding  
Each time I stop trying  
Oh, you remind me of the little things  
'Til I forget the part that's troubling  
And I feel so much better  
When we are together

It's you who brings the morning  
And you who takes the sun when I sleep  
You're the only who stuck around  
For me when I was losing  
Faith in what I thought I would be  
You're the only one in the dark I see  
The dark I see  
The dark I see

'Cause it's you who brings the morning  
And you who takes the sun when I sleep  
You're the only who stuck around  
For me when I was losing  
Faith in what I thought I would be  
You're the only one in the dark I see
