

Same Sea

Lights

Going the distance every occasion
Heading for somewhere out of the way
Moving and shaking, heavy persuasion,
Keeping us out there caught in the waves

Tread the water in the deep
Just waiting for the tides to meet

And when the currents take us out again to opposite oceans
out of the hands of safety
From the shallows to the deepest end
Places we break and bend
you're the one in it with me
No matter how far we get
Oceans we are in still connect
And when the currents circle back again
They'll carry us with them
To the arms of the same sea

Isn't it all just part of the nature
Piece of the business, part of the view
Physical labor, human behavior
It's an illusion I'm passing through

No place to stand or set my feet
Just waiting for the ends to meet

And when the currents take us out again to opposite oceans
out of the hands of safety
From the shallows to the deepest end
Places we break and bend
you're the one in it with me
No matter how far we get
Oceans we are in still connect
And when the currents circle back again
They'll carry us with them
To the arms of the same sea

The tides we're carried in
The lengths they take us to
They come around again
And bring me back to you

And when the currents take us out again
From the shallows to the deepest end
They'll carry us with them
To the arms of the same sea
To the arms of the same sea
To the arms of the same sea
To the arms of the same sea
You're the one in it with me
In the arms of the same sea
