

## Slow Down

### Lights

In the garden with the wild  
I can feel you like a child  
Seeing shadows in the room  
Like the fall and the rise  
And the young and the wise  
Playing dead with the moon  
Chasing you

When I was young you were only a ghost  
Taking old friends leaving me alone  
When we are grown  
Tell me where do we go  
So fast  
Taking my cheeks in the palm of your hand  
Making me weak when I need to stand  
If I can't keep you, nobody can so  
Slow down, slow down

In the speed of the traffic  
With the rush in the rapids  
When the ends come and meet  
And I know you by the days  
From the moment we awake  
Like the sour and the sweet  
And you can see

When I was young you were only a ghost  
Taking old friends leaving me alone  
When we are grown  
Tell me where do we go  
So fast  
Taking my cheeks in the palm of your hand  
Making me weak when I need to stand  
If I can't keep you, nobody can so  
Slow down, slow down
