

# White

## Lights

White white white white  
White white white white

Are there oceans full of things you never see?  
Are there skylines of the cities you don't see?  
Is there music muted playing underneath?  
Is mathematics keeping you from thinking free?

Do you see lights?  
Turn your shadows white  
White white white white  
White white white white

Don't let rain clouds  
Cloud all of your parades  
Let the other side of darkness kiss your face  
Into the sea, into the sea

Do you see lights?  
Turn your shadows white  
Do you feel bright?  
Turn your shadows white

All the things I want to say  
All the shadows in the way

Do you see lights?  
Turn your shadows white  
Do you feel bright?  
Turn your shadows white

White white white white  
White white white white
