

# Break Free

## Like A Storm

Help me  
I've fallen further in myself  
I'm stuck here again  
And I can't see  
That I'm not digging my way out  
I'm digging my grave.

I've become my own demise  
Paralyzed inside my mind  
Arms are weak from holding up this front  
No escape and no surprises  
Complicated compromises  
Hold me down  
When what all I really want

Break free, break free, break free  
From everything  
Break free  
Before it breaks me  
There's got to be another way  
Start again.

Tell me  
How you can be the brighter star  
That light up the sky  
Well I can't seem  
To even light up my own place  
And I've burned out from trying

I've become what I despise  
Paralyzed inside a lie  
Arms are weak from holding back the flood  
Sinking as the waters rise  
Drink myself to sleep each night  
I'm going under  
And all I really want

Break free, break free, break free  
From everything  
Break free  
Before it breaks me  
There's got to be another way

Start again

No  
Going under  
I all I really want  
Break free

Break free  
Before it breaks me  
There's got to be another way

Start again  
Start again  
Start again

There's got be another way.

Start again  
Start again  
Start again  
Start again
