

Learn Your Place

Like Moths to Flames

Don't give me false hope
This is the darkest that I've ever felt
I never asked so don't assume
That I would need your help
Well I'll never fucking need it again

Now the devils reaching up to me
I think I feel his hands
Around my neck
I've never felt this pain
I've never been here before
Convinced I'll never be the same

You've never lived in my mind
You can't decide what's fair
Now learn your place before I put you there

I know you're terrified to die
Not hard to see by the way you slowly live your life
I'm still content with everything that I continue to create for myself

You never needed to drag me through the hell
That you've been feeling inside
This is the place
That we've been dying to find

These nights still drag me down
But you will learn your place
When I climb out of this hell
If you've been dying inside
This is the place
That we've been dying to find

These nights still drag me down
But I will find my faith
When I climb out of this hell
I know I'll never forget
This is the place
That I will always regret

Fuck all the faith I found
So far it's only let me down
I'm doing more with my life
Than you can say for yourself
Fuck all the faith I found
So far it's only let me down

Patience is never enough
And all you ever do is complain and want for more
I'm still content with everything that I continue to create for myself

You never needed to drag me through the hell
That you've been feeling inside
This is the place
That we've been dying to find

These nights still drag me down

But you will learn your place
When I climb out of this hell
If you've been dying inside
This is the place
That we've been dying to find

These nights still drag me down
But I will find my faith
When I climb out of this hell
I know I'll never forget
This is the place
That I will always regret

Save me from hell
