

# The Blackout

## Like Moths to Flames

You said this time would be the last  
Around in circles we go again  
Not holding back the way I used to  
A death in me is a death in you

You said this time would be the last  
Around in circle Can't catch my breath  
When will you see my point of view?  
A death in me is a death in you

When we collide  
You'll know what's on my mind  
I hope this cuts you deep  
and you lose sleep at night  
I died inside  
the day you took away what was mine

Visions of a world without the sun  
This is the blackout  
Where all the ends come undone  
We tried to follow paths you made  
You said this time would be the last  
It never changed

Visions of a world without love  
This is the blackout  
Where all the ends come undone  
We tried to follow paths you made  
Misled you're now the enemy

You said this time would be the last  
Around in circles we go again  
Not holding back the way I used to  
A death in me is a death in you

You said this time would be the last  
Around in circles  
Can't catch my breath  
When will you see my point of view?  
A death in me is a death in you

Visions of a world without love  
This is the blackout  
Where all the ends come undone  
We tried to follow paths you made  
Misled you're now the enemy

You are everything I despise  
Your life is such a fucking lie

You said this time would be the last  
Around in circles we go again  
Not holding back the way I used to  
A death in me is a death in you

You said this time would be the last  
Around in circles

Cant catch my breath  
When will you see my point of view?  
A death in me is a death in you
