

## Lost Ones

Lil B

I'm tryina save as many people as I can  
But you know it ain't easy  
(When you're lost)  
People be fucked up  
(Never look down)  
Ya feel me?  
(When you're lost)  
I had to make this for the people that don't understand when they're lost  
(You know I'll be around)  
But they be

When you're lost you make bad decisions  
You don't even know bout the mission  
You follow everybody that got a position  
In the dark you're scared  
Give up everything just to be cool  
Fake people love to copy  
Would cross your own family just to be in the game  
Killing innocent people, just to gain some fame  
Back home you playin the crazy game  
This shit that makes it go insane

When you're lost  
Never look down  
When you're lost  
You know I'll be around

You know, people minds be out and in  
In and out

When you're lost  
Never look down  
When you're lost  
You know I'll be around

In and out we spirallin

Rest your room that expose your brains  
Taking chances, listening to pears  
They jump off the bridge  
So you go

They don't want nothing  
Then you don't want it  
You jump somebody just to prove that you are loyal  
But you're lost, another shadow so spoiled  
And the sick lose their life when evil strikes  
The evil move at night  
They wanna hide but we can see that light

When you're lost  
Never look down  
When you're lost  
You know I'll be around

They need help  
Just keep your mind right

When you're lost  
Never look down  
When you're lost  
You know I'll be around

I gotta keep my mind right  
This shit be happening every night  
I gotta keep my mind right, yea

Daytime I put a mask on  
Some days I don't accept it  
They ask for it,  
All of the pain, all of this pressure  
People, they be preyin on the naive  
Love the world but the hangin around demons  
Put all your trust in a lie that's so decievin  
They say they got your back, but what does that mean?  
When you fall, they takin everything  
They push you from the front, just to see you scream

When you're lost  
Never look down  
When you're lost  
You know I'll be around

It's Lil Boss  
Watch the sons form the faith  
They won  
See your worst in them, you take your place

When you're lost  
Never look down  
When you're lost  
You know I'll be around

Watch out  
Watch out for the fakes  
Yea

Girls sellin their bodies against they own will  
Dudes doing drugs, you don't know how to feel  
You get dumped in the pains of life  
Everything I pinch myself just to see if I'm alive  
I got to sleep, I'm so asleep  
I'm in deep dark, it changes every week  
You can stay away from the hate  
They love to see you fake

When you're lost  
Never look down  
When you're lost  
You know I'll be around

When you're lost  
Never look down  
When you're lost  
You know I'll be around
