

# Unchain Me

Lil B

Been a long time coming  
A lot of pain a lot of triumph  
Now I've come to the point where I'm happy

You could break me out the strait jacket  
This hip-hop is just play action  
I switch off and I keep smashing  
I'm a legend, fuck the rap-off  
They say I can't do my thing  
I'ma build my own lane  
You come in, you get ran over  
But damn, you sober  
I'm the god emcee like Hova  
But I'm on another level and my grind is over  
I'll put the heat on your back like you're sitting in Rovers  
And he always prayed to God I'm just bringing him closer  
Feel like I'm doing a bid and my mind in Angola  
You be food, then I'm cool, they tried to get over  
I stopped picking up my phone, they won't get any closer  
They watch my every step because I'm living in motion  
Seen it in the hood, I can't, feeling is open  
They ask for my money, every other day like I'm asking for something  
But when I had nothing they was laughing  
They told me that I'd never make it rapping  
It brings tears to see I'm on top, but I told you I'ma make it  
14, I was living like my life was the pavement  
And I wanted to die, couldn't nobody save me  
Now I save my own self and I'm on and I'm famous  
And I deal with the haters  
Ain't nobody gonna take away what I built  
Fuck the death threats, small impostors  
But really got the love, but they just choosing that option  
When I started to live better, they started to hate  
I still got the same brain, that caught all the cases  
I've still got the same eyes and seen all them places  
But I ain't never been faking  
And, it's not a game, it's not the Trail Blazers  
Throwing shots but we dying  
And the rap game  
It's the slave trade  
No time for meditation  
Turn into robots  
The Devil is money  
It's not even human  
The people die for a piece of paper  
It's so stupid  
Man, live however you do it  
I guarantee, you see your life as a child  
And make you who you are,  
Just make sure that you smile  
People are dying every day, might as well look at me now  
There was hating, but I never stopped  
I wanted to drop, but Based God  
He gave me strength from the veins  
I gotta really notice my chance  
Make history, man  
Three back, I was feeling like "damn!"

You don't know how I felt  
When I was washing my hands  
Off that filth that was around  
I'd never be down  
One the streets I'm gone  
I never be around  
Because the hood is a lie  
Man, you better wake up  
Before you're dead or surprised  
I'm just trying to save myself man  
For real, but they trapped in the middle  
Don't wanna go to school  
Because the teacher's too simple  
I just wanna know where I come from  
Did you tell me, the truth, before I'm gone and dissolve  
Man, it's connected to the woods  
The wilderness is my home  
The world say I'm bad because of my color  
But they don't get the fact that I say that I love you  
People give the option to hustle  
Just take it and, I swear to God if you're willing to struggle  
And once you pass the bottom you gonna get to the top  
It's a lot of hate up in the world, just make sure that you watch
