

Air Supply

Lil Eddie

Every minute and hour of the day
Contemplating how to fix our love
Someone didn't do
Can't take away all the pain you put into our love
I know I could be a better man
So why don't you ever let it show?
I've been over here
I've been everywhere
You were in the middle when you could've been there
There [x4]
Don't you wanna put me first
I can't believe you got nerve
Now you wanna make it work
Work [x4]

Oh why
Would you wanna cut off my air supply?
You leavin me feels like you're takin my life
Won't survive if you're not by my side
Cause baby, you are my air supply
I'm losing color by the second, no lie
If it's so true, then why man can't cry
Swallow his pride if he needs his life
Baby, though I was your air supply
Air supply [x6]
Baby, though I was your air supply

I wish it was easy as pressing reset on a control
To restart our love
To tape don't lie, bring it back we can play it back
And it show you how you eject our love
Baby girl just wait
Don't wanna hear you talking now
Baby girl can you wait?
We gotta vent this all out
I've been over here I've been everywhere
You were in the middle when you could've been there
There [x4]
Don't you wanna put me first
I can't believe you got nerve
Now you wanna make it work
Work [x4]

Oh why
Would you wanna cut off my air supply?
You leavin me feels like you're takin my life
Don't survive if you're not by my side
Cause baby, you are my air supply
I'm losing color by the second, no lie
If it's so true, then why man can't cry
Swallow his pride if he needs his life
Baby, though I was your air supply

We had so much going on
Can't feel void, what went wrong?
I know you had enough
Cause you didn't give enough

Singing the same song
Keep stringing me along
We're both out of love
Guess our time is up (up)
Tell me why

Oh why
Would you wanna cut off my air supply?
You leavin me feels like you're takin my life
Won't survive if you're not by my side
Cause baby, you are my air supply
I'm losing color by the second, no lie
If it's so true, then why man can't cry
Swallow his pride if he needs his life
Baby, though I was your air supply
Air supply [x6]
Baby, though I was your air supply
