

# Perfect Time

Lil Eddie

I've been thinking of you all day  
I must say baby  
From the moment I washed my face  
You're all I see and nothing more  
Is it the mirror playing tricks on me  
Or am I going crazy  
Cause every time I try to reach to grab you,  
I just fall  
Can't figure out why I just keep hitting ground  
Tryna find a way to get closer  
What's this about feel like I can't live without ya  
From the day we met you took over

When I look into her eyes  
I could see the truth  
Even though she tries to hide  
I will always see right through  
One day girl you will be mine  
And you know it like I do  
So I'll wait for the perfect time

It's like a puzzle I just can't [? ]  
Got me so frustrated baby  
I'm a keep on trying til the masterpiece is done  
And you're standing right in front of me  
I gotta keep my patience  
Possibilities of us keeps me hanging on  
Can't figure out why I just keep hitting ground  
Tryna find a way to get closer  
What's this about feel like I can't live without ya  
From the day we met you took over

When I look into her eyes  
I could see the truth  
Even though she tries to hide  
I will always see right through  
One day girl you will be mine  
And you know it like I do  
So I'll wait for the perfect time (perfect time)

When you stare at me and you smile  
It's so clear that somehow  
You must feel the same way that I do  
Cause no one has made me so upside down before  
So don't ignore baby girl take a chance with me  
I'm waiting...

When I look into her eyes (I look into your eyes yeah)  
I could see the truth  
Even though she tries to hide (she tries to hide)  
I will always see right through (oh yeah yeah)  
One day girl you will be mine (girl you will be mine)  
And you know it like I do (baby yeah)  
So I'll wait for the perfect time (perfect time)

When I look into her eyes  
I could see the truth

Even though she tries to hide  
I will always see right through  
One day girl you will be mine  
And you know it like I do  
So I'll wait for the perfect time
