

# Over Again

Lil Twist

Yeah baby I just wanna be with you  
... all night thinking and just looking to pictures  
I remember when we used to just be cruising and... now  
And sitting... was next in the  
I'm tired to be single... go back to the old days  
Before we split ways you know like when we... own thing  
You want me... count with no one say they feel me  
And introduce to the real me and if my mama knew I slip  
She probably kill me  
But beside that I mean when she... and I'm telling you how it's feel  
So let's just seat down negotiate have a meeting  
Throw... over the water planning the weekend  
And pick up what we have left out  
Talk about the good times we rest out

So if you come back back  
I do it all over turn back time  
And start our love over again, over again.  
So if you come back back  
I do it all over turn back time  
And start our love over again, over again.

We're thinking bout this for a while  
Girl I miss your love I can't forget your smile  
And now I just wanna let you know  
I never should have let you go  
Let em just sayin I was playin  
And I don't wanna hear no complaining  
I just wanna make you smile  
So tell me if you down, no  
And you're the only thing I need  
Can't believe that I just let you go  
Is like I fall  
And I just wanna make you bright just let me know just what you wanna do  
Just let me know

So if you come back back  
I do it all over turn back time  
And start our love over again, over again.  
So if you come back back  
I do it all over turn back time  
And start our love over again, over again.

Cute face, nice smile, but damn I ain't seen it in a while  
I promise I'll slow up and stop being wow  
As long as I love this style, this fill me... bottle  
... liek choose any bag... time to do this hour over again  
And started as we started,  
But damn I should have wished we never party  
Just imagine where we could have been or what it would have been  
Just forget I'll let that I'm a better man  
Tell this... getting better and acting like is previous... never  
... oh we can't act like I'm just rapping  
Baby point is I love you for real and I'm hoping that you really know the deal  
...

Back it up little shawty back it up right  
Back it up little shawty back it up right now  
Yeah
