## **Changing Faces**

## Lila McCann

At first I didn't understand when she walked through the door You let go of my hand and then I knew there must be more I tried to tell myself that you were only friends But your eyes betrayed the smile you gave And I knew right there and then

You were changing faces Right before my eyes One for her and one for me And then I realized Changing faces That moment I was sure I'd be changing places with her

Please don't introduce me, don't be so polite Tomorrow I'll get over you if I just get through tonight I don't think I can stand it while she's standing over there If you just want someone on your arm Then she's the one to wear

You were changing faces Right before my eyes One for her and one for me And then I realized Changing faces That moment I was sure I'd be changing places with her

I think I'm gonna walk away Head right for the door Maybe I should stay and fight But look what I'd be fighting for I wanted so much more

Changing faces That moment I was sure While you were changing faces I'd be changing places with her

Changing faces The look that did you in One for her and one for me Now I can't go back again

Changing faces That moment I was sure I'd be changing places with her

Right before my eyes One for her and one for me Neither one I recognized

Changing faces That moment I was sure I'd be changing places with her
