

Say No More

Lillix

I don't know what you dream through the night
I don't know what you say when your calling your calling now
All I can do is pray that you know where your going
Say no more

Listen now
Do you know what your getting into?
Tell me how
It's fun when you going through hell?

I never said it would be easy
Go ahead and just do it your own way
Taking the wrong way

I don't know what you dream through the night
I don't know what you say when your calling your calling now
All I can do is pray that you know where your going
Say no more

Shut it out
But it's hard when it's screaming in you
You make me proud
And I'm never giving up on you

Wish I could make it easy
Go ahead and just do it your own way
Taking the wrong way

I don't know what you dream through the night
I don't know what you say when your calling your calling now
All I can do is pray that you know where your going
Say no more

The more I try
The further you push away
Let it go
Take it away from me
And let it be

I don't know what you dream through the night
I don't know what you say when your calling your calling now
All I can do is pray that you know where your going
Say no more

Say no more
Say no more
Say no more
Say no more
