

# Middle Of The Night

Lilly Wood & The Prick

Waking in the middle of the night, it's nothing but  
Dark. And be side by side, it feels alright.  
You've got no more than a few years ahead of you  
And it feels alright.  
You're not scared, scared.

You've got to do it, do it, do it  
And take it, take it.  
You've got to have it, have it, have it  
Now don't you think about it.  
Now don't you think about it.

Standing in the middle of the fight  
It don't feel right.  
There's no one on your side  
It don't feel right  
There's not a place left to go and hide  
And it don't feel right  
Go escape, escape

You've got to do it, do it, do it  
And take it, take it.  
You've got to have it, have it, have it  
Now don't you think about it.  
Now don't you think about it.

You've got to do it, do it, do it  
And take it, take it.  
You've got to have it, have it, have it  
Now don't you think about it.  
Now don't you think about it.

Think about it

Now don't you think about it.

And it feels alright.  
And it feels alright.

You've got to do it, do it, do it  
And take it, take it.  
You've got to have it, have it, have it  
Now don't you think about it.  
Now don't you think about it.

You've got to do it, do it, do it  
And take it, take it.  
You've got to have it, have it, have it  
Now don't you think about it.  
Now don't you think about it.

Think about it  
Think about it
