

# The Greenhouse Effect

Limahl

Better be careful, better beware  
High above there's something in the air  
You cannot see it and it doesn't show  
But sooner or later we all will know

Look around you but not too far  
It's not our fault it's just the way things are  
Get the picture I can see it now  
The future race wandering how

There's no pretending no disguise  
Let's face the facts we cannot run and hide  
We've creating problems with the seeds we sow  
As the pendulum swings too and fro

Something must happen this is suicide  
Is the planets destiny worth the try  
And tomorrow when the day is come  
We can all look up and still be one
