

## Astral Projection

Limbonic Art

Leaving the body into a spectral scenery  
Floating virtually on the outer surface, a return to  
abstract fantasy  
Ethereal hallucinations, lucid dreamlike manifestations  
When the soul emancipate from life, engulfed by an  
electric veil of light  
Pulsating ambiance of psychokinetic energy  
Revolving nebulous mist, astrophysical journey  
Ghostliness of the unknown, voices call from beyond  
Disengage the soul from the body  
Power-driven by dark occult reveries, deep sleep  
phenomenon, astral projection  
A prospect of life after death, levitate to arcane  
destiny  
Orbiting the terrestrial soil, reach the zenith of  
ascendancy  
A conduit, voyager, zooming across the periphery  
Adapting wraithlike shapes of existence  
Escaping the ephemeral earthly shell where the soul  
dwell  
Watching, dreaming of illumination, perception,  
redemption  
A passage to the vaporous interstellar domain  
Hypnotic trance, post mortem scenarios, gazing into  
deserted forlorn horizons  
Amorphous shadows, dark tunnels, flashing lights  
Tranquility space, cryogenic slumber, remoteness,  
oblivion  
An epic encounter with the darkness of death  
The emission of light from the sun is dying  
Falling into the void of hypothermia, as freezing  
airstreams encircling
