

How In The World

Linda Eder

I was so sure
Of every step I took
I never thought to look
At all the other roads
Or to wonder where they lead
I didn't think
That there was much I lacked
I had it all, in fact
I had convinced myself
There is no one that I need

How in the world did I miss
This feeling
How in the world it pass me by
How in the world did your kiss
Completely change the world for me
How in the world did this bliss escape me
And all this passion I can't deny
How in the world did it take me
All this time to clearly see
That you are my world All of my life

I thought I had it good
I thought I understood
All that the heart could know
And all that love could be
I was content
And never wished for more
My heart had locked it's door
I wasn't ready for
This gift you gave to me

How in the world did I miss
This feeling
How in the world it pass me by
How in the world did your kiss
Completely change the world for me
How in the world did this bliss escape me
And all this passion I can't deny
How in the world did it take me
All this time to clearly see
That you are my world
