

I Live for the Day

Lindsay Lohan

I've got time to watch you spin around in circles
Falling through the cracks inside your mind
That's fine
I've been through the darkest hour made it to the other side of
you
I can't live without you
I live for the day
I live for the night
That you will be desperate and dying inside
I live for the tears to fall down your face
I live for the words you finally say
I live for the day

You are high, thinking your invincible so busy building castles
in the sky
You're done, and you don't even know it but your eyes have started
showing that it's true
Trying to live without love

I live for the day, I live for the night
That you will be desperate and dying inside
I live for the tears to fall down your face
I live for the words you finally say
I live for the day (2x)

I can't live without you

I live for the day, I live for the night
That you will be desperate and dying inside
I live for the tears to fall down your face
I live for the words you finally say
I live for the day (2x)

Wanna see you crying (3x)

I live for the day
