Who Loves You

Lindsay Lohan

I can tell you things nobody knows Up and everywhere nobody goes Nothing gets me off the way that you do You drive me crazy when you step in the room

Something bout your lips something about your kiss Something bout your eyes keeps you on my mind Thought it was nothing Turns out it is something You're the one that keeps me up every night Whooo loves you? (2x) I think I do Yeah yeah I think I do

You're caught under my skin and i feel you there You're with me all the time you come everywhere When i needed space I push you away But then I want you back you're hard to erase

Something bout your lips something about your kiss Something bout your eyes keeps you on my mind Thought it was nothing Turns out it is something You're the one that keeps me up every night Whooo loves you? (4x) I think I do

You're hard to erase

I think I do, I think I do

I can tell you things nobody knows Up and everywhere nobody goes Nothing gets me off the way that you do You drive me crazy when you step in the room Whooo loves you? (4x)
